SPECIFICATIONS

There is a window **option** for replacement garage doors with the requirement that it must be a long panel, half rounds, 3 mullions and the glass must be clear or opaque. Approval for the garage door must be obtained prior to installation.

Insulation of the garage door is an **option**, not required.

Door sections are formed from 26-gauge galvanized draw quality steel.

Long-lasting durable ten ball rollers assure consistent, efficient operation.

Heavy duty 14 gauge hinges with "wide body" pattern for greater stability and longer life.

CFC-free polystyrene insulation.

Paint system includes .25 mil. primer with rust inhibitor and a .75 mil. coating of baked on polyester paint in white, almond, sandstone, brown, bronze, silver, or evergreen.

Concealed steel plates run continuously from top to bottom of each section for fastening hardware.

White, powder coated hardware is available as an option;

White painted end stiles.

Bottom weather seal utilizes an aluminum retainer and extruded virgin vinyl.

Double sided steel doors are 2" thick with a CFC-free polystyrene core.

Raised panel R-value - 8.07
